

## Tea

### Tea Varieties We Offer

India is renowned for its diverse range of high-quality teas. Here's a look at the unique characteristics and appeal of each tea variety we provide:

#### Black Tea

The most widely produced and exported Indian tea, black tea is known for its bold flavor and strong character. Our black tea selection includes popular types like:

- **Assam** – Robust and malty, ideal for a strong brew.
- **Darjeeling** – Delicate and floral, often referred to as the “Champagne of teas.”
- **Nilgiri** – Smooth and fragrant, with a hint of citrus.

#### Green Tea

Though less exported than black tea, Indian green tea is highly valued for its health benefits and distinctive flavor. Known for being rich in antioxidants, it is increasingly sought after in global markets.

#### Oolong Tea

This semi-oxidized tea offers a unique flavor profile that combines elements of both black and green tea, making it a versatile choice. While oolong exports are less frequent, its popularity is rising in select international markets due to its balanced taste and nuanced character.

Our tea varieties are carefully sourced to ensure premium quality and deliver an exceptional experience for tea lovers worldwide.
